SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/30/2007	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/780,253	<b>Applicant(s)</b> GARFUNKLE, JAY	
	<b>Examiner</b> Todd M. Epps	<b>Art Unit</b> 3632	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 22 December 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1,5-14 and 17-31 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1,5-14 and 17-31 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### DETAILED ACTION

This is the second Office Action **final** for serial number 10/780,253, Table Base, filed on February 17, 2004.

#### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 5-10, 12-14, 17-25, and 27-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,010,922 to Heller et al. (Heller) in view of U.S. Design Patent No. 495,536 to Lucht, and in further view of U.S. Patent No. 3,415,475 to Goodman.

Heller '922 discloses a base (12) having an aperture with internal threads (fig. 2), wherein the base may rest upon the floor; a spider plate (22) having an aperture with internal threads (fig. 1), wherein the spider may directly receive a table top; and a column (10) having an external surface, a first end having threads on the external surface (fig. 2), a second end having threads on the external surface (fig. 2); wherein the base (12) has a central hub surrounding the aperture (fig. 2), and has a plurality of support veins (50); wherein each of the plurality of support veins terminates in a floor pad (90); wherein the central hub of the spider plate is adapted to receive a set screw (28); wherein the spider plate (22) has a central hub surrounding the aperture (fig. 1-2), and has a plurality of unitary support arms (25); wherein each of the plurality of unitary support arms (25) has a plurality of screw holes (36); further wherein each unitary

Art Unit: 3632

support arm is of substantially equal length; wherein the central hub of the spider plate (22) is adapted to receive a set screw (fig. 2); wherein the base and spider plate are manufactured from iron, and how the iron is formed is a limitation on the method of making not on the product; and wherein the column is a tube, and is manufactured from steel, and wherein the spider plate is unitary structure. However, Heller '922 fails to disclose wherein the base having a dome configuration, and a plurality of unitary support veins extend from the central hub and is located underside of the base. Nevertheless, Lucht '536 discloses wherein the base having a dome configuration (fig. 7); a plurality of unitary support veins extend from the central hub and is located underside of the base (fig. 8); and wherein each unitary support vein is of substantially equal length. Accordingly, it would have been obvious to one ordinary skill in the art at the time the invention was made to have modified the base of Heller '922 with the base as taught by Lucht '563 because one would have motivated to enhance the structural strength and rigidity of the base.

Next, Heller '922 in view of Lucht '563 fails to disclose wherein the dome configuration base having an aperture with internal threads. Attention is directed to Goodman '475, which discloses a dome configuration base having an aperture with internal threads. Accordingly, it would have been obvious to one ordinary skill in the art at the time the invention was made to have modified the base of Heller '922 in view of Lucht '563 to include the base having an aperture with internal threads as taught by Goodman '475 because one would have motivated to provide for superior mounting of the column into the base when both are threadly attached.

Furthermore, Heller '922 in view of Lucht '563 does not disclose wherein the dome configuration base with each of the plurality of support veins terminates in a floor pad. Accordingly, it would have been obvious to one ordinary skill in the art at the time the invention was made to have modified the dome base of Heller '922 in view of Lucht '563 to include a floor pad at each end of the support veins wherein doing so would provide anti-marking means for the base when the base is being moved.

Claims 11, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heller '922 in view of Lucht '563, in further view of Goodman '475 and in further view of U.S. Patent No. 4,081,012 to Wallace.

Regarding claim 11, Heller '922 teaches the previous invention wherein the column having threads on the external surface on both ends, but fails to specifically teach threads having an adhesive. Nevertheless, Wallace '012 teaches the well-known concept of having an adhesive on threads (fig. 1). Accordingly, it would have been obvious to one ordinary skill in the art at the time the invention was made to have modified the threads of Heller '922 with an adhesive on threads as in Wallace '012 so as to provide for superior mounting of the column on a vertically extending object.

### ***Response to Arguments***

Applicant's arguments filed September 14, 2006 with newly amended claims filed December 22, 2006 have been fully considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

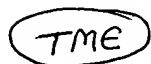

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Todd M. Epps whose telephone number is 571-272-8282. The examiner can normally be reached on M-F (7:30-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Friedman can be reached on 571-272-6842. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
